                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence 7, Application US/10138787

Patent NO. US20020172984A1

GENERAL INFORMATION:
APPLICANT: Holland, Sacha
APPLICANT: Moamalu, Geraldine
APPLICANT: Pawson, Tony
APPLICANT: Pawson, Tony
TITLE OF INVENTION: OLIGOMERIZED RECEPTORS WHICH AFFECT PATHWAYS REGULATED
TITLE OF INVENTION: BY TRANSMEMBRANE LIGANDS FOR ELK-RELATED RECEPTOR
TITLE OF INVENTION: TYROSINE KINASES
FILE REFERENCE: 11757. 33USWO
CURRENT APPLICATION NUMBER: US/10/136,787
CURRENT PILING DATE: 2002-05-03
                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Sequence 510, Application US/09925297 Patent No. US20020081659A1 GENERAL INFORMATION:
